I think that the Lawsuits against Microsoft are a Joke! And I also believe that America Should be Ran by Americans .If we don't take america back in ten years there is not going to be an America Land of the Free! Because If Bill Gates invented Microsoft and got Rich then that is the American way right? America is not ran by Americans It been took over by the Jewish people! It seen that they don't one us Americans to make it in our on country.You can look it up if you don't believe this But the Jewish people own every thing that makes money and I mean everything.We have got to wake up People and take America Back! The internet is the only place that is left that has Free Speech What you read and watch on TV is what they want you to see. The United Jewish America States has Screwed Bill Gates out of his American Dream! Iam Sick Of It!!! Sonthron#1
